mediaBrilliance

digital systems and strategy | design. code. clarity.

Digital Services

Clean, accessible digital experiences for small businesses, creators, nonprofits and other cool people. We focus on what works, not what's trendy. Every project prioritizes clarity, functionality and thoughtful design.

Websites, Apps and Systems

Website Development

Custom-designed websites built on the right platform for your needs, whether that's Squarespace, WordPress or custom code.

- Responsive design for all devices
- Content management system setup
- Contact forms and integrations
- SEO fundamentals
- Bilingual (English/Spanish) available

Website Optimization

Improve your existing site's performance, accessibility and search visibility through audits and targeted improvements.

- SEO audit and optimization
- Accessibility improvements (WCAG)
- Performance tuning
- Meta tag and social sharing setup
- Recommendations document

Site Maintenance and Updates

Ongoing support for existing websites: content updates, bug fixes and keeping things running smoothly.

- Content and image updates
- Plugin/theme updates
- Bug fixes and troubleshooting
- Backup and security monitoring

App Development

Native iOS apps with SwiftUI. Privacy-focused, polished experiences for iPhone and iPad.

- Native iOS development
- Privacy-first architecture
- App Store submission
- Ongoing maintenance

Systems and Tools

Custom workflows, automations and internal tools to streamline your operations.

- Workflow automation
- Internal tool development
- Integration setup
- Documentation and training

Strategy and Planning

◆ Digital Presence Audit

Comprehensive review of your current online presence: website, social media, search visibility and competitor analysis.

- Website and SEO audit
- Social media presence review
- Competitor analysis
- Actionable recommendations

◆ Content Strategy

Planning and structuring your website content to serve your audience and business goals.

- Content audit and gap analysis
- Information architecture
- Messaging framework
- Implementation roadmap

Social Media

◆ Strategic Planning

SMART goals aligned to your buyer's journey. Awareness, consideration and conversion objectives with measurable KPIs.

- Platform selection and strategy
- Goal setting aligned to buyer's journey
- Competitive analysis
- Implementation timeline

◆ Persona Development

Detailed audience research, segmentation and buyer personas so your content reaches the right people.

- Buyer persona creation
- Audience segmentation
- Platform recommendations
- Messaging frameworks

◆ Content Systems

Content pillars, platform-specific calendars, post templates and visual guidelines. Education over promotion.

- Content pillar development
- Content calendars
- Post templates and guidelines
- Visual style guide

◆ Social Listening

Monitor brand mentions, track sentiment and gather competitive intelligence to inform strategy.

- Brand mention monitoring
- Sentiment tracking
- Competitive intelligence
- Trend identification

◆ Paid Amplification

Strategic ad campaigns to extend organic reach. Targeting, budgeting and A/B testing for ROI.

- Campaign strategy
- Audience targeting
- Budget planning
- A/B testing and optimization

◆ Analytics and Reporting

Meaningful metrics, not vanity metrics. Track reach, engagement, conversions and actual business impact.

- KPI tracking and dashboards
- Performance reporting
- ROI analysis
- Strategy recommendations

Design and User Experience

◆ UX Design

User-centered design work to improve how people interact with your digital products.

- User research and personas
- Wireframes and prototypes
- Usability testing
- Design documentation

◆ Brand Identity

Visual identity development for new businesses or refreshes for existing brands.

- Logo design
- Color palette and typography
- Brand guidelines
- Basic marketing materials

Our Approach

» **The 5D process.** Every project follows a clear path: *discover* your goals and audience, *design* the solution, *develop* the work, *document* for handoff, *deploy* to the world.

» **Accessibility first.** Inclusive design for all audiences. Proper contrast, clear hierarchy, readable content and equitable access are standard across web, apps, brand and social.

» **Right tool for the job.** We're platform-agnostic. Whether it's Squarespace or SwiftUI, Instagram or a custom system, we recommend what makes sense for your situation.

» **Honest about limitations.** Every platform has constraints. We're transparent about what's possible within your budget, timeline and environment.

» **Documentation matters.** Every project includes clear documentation so you understand how things work. We don't build dependency. We build capability.

Who We Work With

Small businesses, creative professionals, nonprofits and other cool people who value thoughtful work over quick fixes. Flexible arrangements for community organizations and projects that align with our values.
