  - design & development
  - strategy

ongoing support
  - updates • backups • priority support • monthly check-in

most projects are scoped as flat-rate engagements after a free, friendly consultation.

hosting and infrastructure

all mediaBrilliance digitalxtudio websites are custom-designed, custom-built, and hosted on modern, secure infrastructure chosen for speed, reliability, and longevity.

we do not use template-based platforms that limit design quality or performance, because clutter is less than clarity.

our recommended hosting includes automatic security, global performance optimization, backups, and ongoing maintenance.

in short: we design it. we build it. we deliver it. and it just works.
